

To Whom It May Concern,

The purpose of this letter is to provide an academic reference for Mr. John Brooks, whom I recommend without hesitation, due to his outstanding academic abilities and professionalism.

I have had the pleasure of instructing Mr. John Brooks at Full Sail University in both of my classes Data Visualization and Machine Intelligence Systems during the year 2017.

In both classes he was very engaged whenever I asked challenging questions that other students didn't elaborate on. The answers he provided showed great depth of understanding into the class materials, it was obvious that he has passion in these subjects.

The classes at Full Sail are very fast-pace and hands-on which require a high level of dedication to succeed. Mr. John Brooks definitely showed this in my classes. He grasps complex ideas quickly, completes difficult assignments throughout the classes on time with outstanding quality. His works displayed a high degree of professionalism, integrity, and intellectual abilities.

In the end, it did not surprise me that he completed both classes with an A average. His dedication and passion for the computer classes impressed me. I have no doubt that he will be a valuable asset to whichever company he works in, and I am more than happy to give my endorsement on the subject. Please feel free to email me for any additional questions.

Sincerely,

Brandon Patterson

Course Director, Data Science, Full Sail University.
